

In the municipality of Sesto at the base of Mount Elmo is a cozy refuge Gallo Cedrone. Situated at a height of 2150 meters above sea level, offers a refuge for all those visitors a place to refresh themselves and enjoy a peaceful rest before resuming the journey towards the most spectacular resorts of the Dolomites Alps Carniche.

The refuge is a great starting point for the Traversata Carnica: for overnight we have the availability of three double bedrooms and 8 beds in common (only for the summer season).
