

From **Rifugio Pier Fortunato Calvi** (2164m) climb north to **Passo Sesis**, which continues down along the trail 140.

Arriving at **Fleons Casera di Sopra** (1864m), continue east down again following the same path 140 to get to **Fleons Casera di Sotto**, then get on the path 142. This continues for **Casera Sissanis**, Sella Sissanis and **Passo Giramondo** (2005m) where there is the state border.

At this point the route continues on Austrian territory, and marker 403, falling progressively along the **Obere Wolayer Alpe**.

Going up the ridge until we reach the refuge **Bimbaumer Torl**, you are close to the **Pichl Austrian Hut**, where you can see **Lake Volaia**.

After five minutes of walk along the lake between **Mount Capolago** (2492m) and **Coglians** (2780m) you come to **Rifugio Lambertenghi - Romanin** at 1955m.
